Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Faxing of Responses to Office Actions

In order to reduce pendency and avoid potential delays, TC 3700 is encouraging FAXing of responses to Office Actions directly into the Group at (703)872-9302 (Official) and (703)872-9303 (for After Finals). This practice may be used for filing papers which require a fee by applicants who authorize charges to a PTO deposit account. Please identify the examiner and art unit at the top of your cover sheet. Papers submitted via FAX into TC 3700 will be promptly forwarded to the examiner.

Claim Objections

1. Claim 9 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claim 9 discloses the same limitation as disclosed in line 3 of claim 1.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 3 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In Claim 3, it is not understood how the identifier label is attached to device in which the component is installed, wherein in Claim 1 discloses “the identifier is encoded in a component. There seems to be a discrepancy as to where the label is located.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claim 1-6, 9, and 19-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kelly, Jr. (5,900,610).

Art Unit: 3722

Kelly discloses in Fig. 2-9, an article comprising: a component container (24); a plurality of labels which consist of first label (30) and second label (40) removably affixed to the component container (24) and having printed thereon an electronically encoded bar code identifier (42), wherein the identifier is encoded on a device (20) in which the component is installed inside the component container and uniquely identifies the component; wherein the second label (40) is attached to a package (24) that is shipped.

However, Kelly does not disclose: an identifier encoded in a container.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to place the identifier label in any location on or in the component, since it has been held that rearranging parts of an invention involves only routine skill in the art. *In re Japikse*, 86 USPQ 70.

4. Claims 7, 8, 25 and 26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kelly, Jr. in view of Brower et al (6,348,685).

Kelly discloses an article comprising all the elements as disclosed in Claims 1 and 19. However, Kelly does not disclose: wherein the container is constructed of polyester and is an electrostatic discharge bag.

Brower et al discloses in Fig. 9, a polymeric material (polyester) electrostatic discharge bag (14) container.

Art Unit: 3722

Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify Kelly's container and replace it with an electrostatic bag as taught by Brower et al for the purpose of holding electronic equipment.

Prior Art References

The prior art references listed in the attached PTO-892, but not used in a rejection of the claims, are cited for (their/its) structure. Watson, Juszak et al, Rotermund, Chess, Mangini et al, Jahier et al, Cahill, and Beal et al disclose label articles.
